TEXAS EVERBEARING FIG

Every year we see this wonderful fig bearing and fruiting we are more favorably impressed with it. The claims we have made for it heretofore are not exaggerated. It stands more cold than any other fig we know of; and even when frozen to the ground, it will come back the following summer and bear a crop of figs. The fruit is very large, light lemon yellow, fine quality, and for productiveness, have never seen anything to equal it. Have seen cuttings planted in April make a 3 ft. growth by August, and have fifteen to twenty figs to the plant. If you like figs, you will be well pleased with this wonderful new introduction. Many customers who have never been able to raise figs before, find this one easy to grow and fruit. Price for plants about 3 ft. in ht. with heavy root system, sure to bear first year.

Cat. W-763—Each 25c—10 for \$2.00—100 for \$15.00.
